In human society, family (from Latin: familia) is a group of people related either by consanguinity (by recognized birth) or affinity (by marriage or other relationship). The purpose of families is to maintain the well-being of its members and of society. Ideally, families would offer predictability, structure, and safety as members mature and participate in the community.

The Olson Circumplex Model (Olson, 2000) conceptualizes flexibility, cohesion and communication skills as three central variables that define family interactions.
