E-Commerce Law Around the World contains summaries of E-commerce statutes, regulations, directives and model legislation of the United Nations, the European Union, and more than 120 countries on six continents. At the end, the laws are synthesized and commonalities and differences among them are noted. This is Volume I of the E-COMMERCE LAW TRILOGY. The other volumes are also scheduled for release in 2011: Volume II, The Model Electronic Transactions Act: An E-Commerce Law for the World; and Volume III, Certification Authority Law Around the World. All of them will soon be available for purchase at Xlibris.com, Amazon.com, BarnesAndNoble.com, and other outlets. The Secure World Foundation developed the Handbook for New Actors in Space, which is intended to provide nations, established satellite operators, start-up companies, universities, and other space actors with a broad overview of the fundamental principles, laws, norms, and best practices for
peaceful, safe, and responsible activities in space. This now famous White Paper provides rules for our digital highway. Examines each of the major areas of intellectual property law, focusing primarily on copyright law & its application & effectiveness, especially subject matter & scope of protection, copyright ownership, term of protection, exclusive rights, limitations on exclusive rights, copyright infringement. Holds Internet service providers legally accountable for copyright & other infringements by their users. Judges are beginning to use this document to form case law. Material is arranged geographically. For each country there is a country profile followed by information on marketing data, communications, transportation, business travel, key contacts, and a summary trade regulations and documentation required. Also included are brief sections on U.S. ports, U.S. foreign trade zones, World Trade Center Association members, U.S. government agencies providing assistance to exporters, foreign trade organizations, foreign communications, and general exports and shipping information and practice. The fourth edition of International Business Law and the Legal Environment: A Transactional Approach gives business and law students a clear understanding of the legal principles that govern international business. This book goes beyond compliance by emphasizing how to use the law to create value and competitive advantage. DiMatteo’s transactional approach walks students through key business transactions—from import and export, contracts, and finance to countertrade, dispute resolution, licensing, and more—giving them both context and providing real-world applications. More concise than previous editions, this new edition also features: • Added coverage of new technologies, such as smart contracts, digital platforms, and blockchain technology • Discussion of businesses and sustainability, climate change, and creating a circular economy • Greater focus on UNIDROIT Principles and a review of INCOTERMS 2020 • Expansion of common carrier coverage to include CMI trucking and CMR railway conventions • International perspective and use of a variety of national and international law materials • Great coverage of EU substantive law Upper-level undergraduate and postgraduate students of business law and international business will appreciate DiMatteo’s lucid writing style, and professionals will find this book to be a comprehensive resource. Online resources include an instructor’s manual, PowerPoint slides, test bank, and other tools to provide additional support for students and instructors. This Manual has been prepared in response to repeated demands from developing country Member States for capacity building.
in patent drafting due to the existing limited professional capacity in this area which is an obstacle to the utilization of the intellectual property system by their nationals. The target audience for this Manual is primarily but not exclusively in developing countries and consists of scientists, researchers, technically trained persons and attorneys with a technical background who wish to draft patent applications. The Manual provides the necessary guidelines and an understanding of the skills needed for drafting a patent application, filing it and working with patent authorities to have it issued as a patent. The primary aim of this Manual is to assist all inventors in protecting their intellectual property through carefully crafted patent applications. Studies in the Contract Laws of Asia provides an authoritative account of the contract law regimes of selected Asian jurisdictions, including the major centres of commerce where limited critical commentaries have been published in the English language. Each volume in the series aims to offer an insider's perspective into specific areas of contract law - remedies, formation, parties, contents, vitiating factors, change of circumstances, illegality, and public policy - and explores how these diverse jurisdictions address common problems encountered in contractual disputes. A concluding chapter draws out the convergences and divergences, and other themes. All the Asian jurisdictions examined have inherited or adopted the common law or civil law models of European legal systems. Scholars of legal transplant will find a mine of information on how received law has developed after the initial adaptation and transplant process, including the mechanisms of and influences affecting these developments. At the same time, many points of convergence emerge. These provide good starting points for regional harmonization projects. Volume III of this series deals with the contents of contracts and unfair terms in the laws of China, Hong Kong, India, Indonesia, Japan, Korea, Malaysia, Myanmar, the Philippines, Singapore, Taiwan, Thailand, and Vietnam. Typically, each jurisdiction is covered in two chapters: the first deals with the contents of contracts and how contractual terms are identified and interpreted; the second deals with unfair terms, the situations where the law will interfere in matters of 'unfairness' relating to contract terms, and legal responses to unfair terms. Of the ICTR Statute. Get rich in Cyberspace! Here is the first map and sourcebook to the personal finance services, resources, and planning tools available on the Net. This comprehensive, easy-to-use guide features hundreds of listings for investment advice; resources for trading stocks, bonds, and mutual funds; comprehensive listings of the
best financial conferences, forums, products and services on the Internet. This book examines the constitutional principles governing the relationship between legislatures and courts at that critical crossroads of their power where legislatures may seek to intervene in the judicial process, or to interfere with judicial functions, to secure outcomes consistent with their policy objectives or interests. Cases of high political moment are usually involved, where the temptation, indeed political imperative, for legislatures to intervene can be overwhelming. Although the methods of intervention are various, ranging from the direct and egregious to the subtle and imperceptible, unbridled legislative power in this regard has been a continuing concern in all common law jurisdictions. Prominent examples include direct legislative interference in pending cases, usurpation of judicial power by legislatures, limitations on the jurisdiction of courts, strategic amendments to law applicable to cases pending appeal, and attempts directly to overturn court decisions in particular cases. Because the doctrine of the separation of powers, as an entrenched constitutional rule, is a major source of principle, the book will examine in detail the jurisprudence of the United States and Australia in particular. These jurisdictions have identical constitutional provisions entrenching that doctrine as well as the most developed jurisprudence on this point. The legal position in the United Kingdom, which does not have an entrenched separation of powers doctrine, will be examined as a counterpoint. Other relevant jurisdictions (such as Canada, Ireland and India) are also examined in the context of particular principles, particularly when their respective jurisprudence is rather more developed on discrete points. The book examines how the relevant constitutional principles strive to maintain the primacy of the law-making role of the legislature in a representative democracy and yet afford the decisional independence of the judiciary that degree of protection essential to protect it from the legislature's 'impetuous vortex', to borrow the words of James Madison from The Federalist (No 48). For over two decades, Casenote Legal Briefs have helped hundreds of thousands of students prepare for classes and exams year after year with unparalleled results. Known throughout the law school community as high-quality legal study aids, Casenotes popular series of legal briefs are the most comprehensive legal briefs available today. With over 100 Casenotes published today in all key areas, ranging from Administrative Law to Wills, Trusts, and Estates each and every Casenote offers: professionally written briefs of the cases in your casebook coverage that
is accurate and up-to-date editor's analysis explaining the relevance of each case To the course coverage built on decades of experience the highest commitment to quality and don't forget Aspen's other popular study aids: Click here to buy all your study aidsThis book reports on practical approaches for facilitating the process of achieving excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development, and social renewal. In particular, the book presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. It covers ontologies, intelligent management systems, methods for creating knowledge and value added. It gives novel insights into time management and operations optimization, as well as advanced methods for evaluating customers’ satisfaction and conscious experience. Based on the AHFE 2016 International Conference on Human Factors, Business Management and Society, held on July 27-31, 2016, Walt Disney World®, Florida, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities.This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process accelerated during China's transition to a market economy. It is structured around the core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels - practical application of the CCL and scholarly commentary.This is a compact, authoritative dictionary designed especially for Australian users. Like other one-volume dictionaries it presents a selection, from the vast store of international usage, of those words which are current and relevant in the Australian context. But it does this with an authority which no other Australian dictionary can claim. This authority has two bases, the international and the Australian. The dictionary's international authority is announced in the use of the name Oxford; its Australian authority comes from its having been fully edited at the Australian National Dictionary Centre in Canberra. Oxford (Australia's largest reference publishers) its editors had access to the most comprehensive database of the English language as it is used world-wide - the same database as that which forms the twenty-volume Oxford English Dictionary - and to the most recent distillation of this in the latest edition of the pace-setting Concise Oxford Dictionary. Through the Centre the dictionary's editors had access to the largest citation database of Australian English: that which forms the Australian National Dictionary. The Australian Concise Oxford Dictionary is the first product of this lineage and its publication heralds a new era in Australian lexicography. Special features include: * Completely revised Australian pronunciations, represented in IPA notation; * up-to-date Australian spellings and their alternatives; * full coverage of historical areas of Australian English - convict terms, the language of the gold rushes, exploration, settlement etc.; * up-to-date coverage of scientific and technological terminology, especially of computer terminology; * full and reliable definitions and etymologies for words of Aboriginal origin, Aboriginal English words, etc. The product of a unique collaboration between academic scholars, legal practitioners, and technology experts, this Handbook is the first of its kind to analyze the ongoing evolution of smart contracts, based upon blockchain technology, from the perspective of existing legal frameworks - namely, contract law. The book's coverage ranges across many areas of smart contracts and electronic or digital platforms to illuminate the impact of new, and often disruptive, technologies on the law. With a mix of scholarly commentary and practical application, chapter authors provide expert insights on the core issues involving the use of smart contracts, concluding that smart contracts cannot supplant contract law and the courts, but leaving open the question of whether there is a need for specialized regulations to prevent abuse. This book should be read by anyone interested in the disruptive effect of new technologies on the law generally, and contract law in particular. "The process presented by the author can be applied to any project, whether it be building a garage or planting a garden. The examples presented provide a clear and concise picture of the complete set of activities, how the responsible parties interact, and which products are the desired outcome for each activity." -- BOOK JACKET. This book gives an introduction to the English law of contract. The third edition has been fully updated to cover recent developments in case law and recent statutes such as the Consumer Rights Act 2015. However, this new edition retains the primary focus of the earlier editions: it is designed to introduce the lawyer trained in a civil law jurisdiction to the
method of reasoning in the common law, and in particular to the English law of contract. It is written for the lawyer - whether student or practitioner - from another jurisdiction who already has an understanding of a (different) law of contract, but who wishes to discover the way in which an English lawyer views a contract. However, it is also useful for the English law student: setting English contract law generally in the context of other European and international approaches, the book forms an introductory text, not only demonstrating how English contract law works but also giving a glimpse of different ways of thinking about some of the fundamental rules of contract law from a civil law perspective. After a general introduction to the common law system - how a common lawyer reasons and finds the law - the book explains the principles of the law of contract in English law covering all the aspects of a contract from its formation to the remedies available for breach, whilst directing attention in particular to those areas where the approach of English law is in marked contrast to that taken in many civil law systems.

This book traces the evolution of crimes against humanity (CAH) and their application from the end of World War I to the present day, in terms of both historic legal analysis and subject-matter content. The first part of the book addresses general issues pertaining to the categorization of CAH in normative jurisprudential and doctrinal terms. This is followed by an analysis of the specific contents of CAH, describing its historic phases going through international criminal tribunals, mixed model tribunals and the International Criminal Court. The book examines the general parts and defenses of the crime, along with the history and jurisprudence of both international and national prosecutions. For the first time, a list of all countries that have enacted national legislation specifically directed at CAH is collected, along with all of the national prosecutions that have occurred under national legislation up to 2010.

In Crimes Against Humanity in the 21st Century, Dr Robert Dubler SC and Matthew Kalyk provide a comprehensive analysis of crimes against humanity in international criminal law, including an analysis of its history, its present definition and its raison d'etre. With a foreword by Geoffrey Robertson QC. This book explores various approaches around the world regarding price term control, and particularly discusses the effectiveness of two major paths: ex ante regulatory and ex post judicial intervention. Price control and its limits are issues that affect all liberal market economies, as well as more regulated markets. For the past several years, courts in many different countries have been confronted with the issue of
whether, and to what extent, they should intervene regarding price-related terms in standard form contracts - especially in the area of consumer contracts. Open price clauses, flat remunerations, price adjustment clauses, clauses giving the seller/supplier the right to ask for additional payments, bundling or partitioning practices, etc.: a variety of price related terms are used to manipulate customers’ choices, often also by exploiting their behavioral biases. The result is an unfavorable contract that is later challenged in court. However, invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect, which means that in thousands if not millions of similar contracts, the same clauses continue to be used. Effective procedural rules are often lacking. Therefore, pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators. The aim of this book is to determine the various approaches in the world regarding price term control, and particularly to discuss the efficiency of both paths, ex ante regulatory and ex post judicial intervention. Thanks to its broad comparative analysis, this book offers a thorough overview of the methods employed in several countries. It gathers twenty-eight contributions from national rapporteurs and one supra-national rapporteur (EU) to the 2018 IACL Congress held in Fukuoka. These are supplemented by a general report presented at the same IACL Congress, which includes a comparative analysis of the national and supranational reports. The national contributors hail from around the globe, including Africa (1), Asia (5), Europe (17), the European Union (1) and the Americas (5). Based on the popular Developing Leadership Talent program offered by the acclaimed Center for Creative Leadership, this important resource offers a nuts-and-bolts framework for putting in place a leadership development system that will attract and retain the best and brightest talent. Step by step, the authors explain how alignment with strategic goals and organizational purpose and effective developmental experiences are the backbone of a successful leadership program. An authoritative and useful book, Developing Leadership Talent is an essential tool for any leadership program. A Restatement of the English Law of Contract is the second Restatement of English law undertaken by Andrew Burrows following on the success of A Restatement of the English Law of Unjust Enrichment (OUP, 2012). Designed to enhance the accessibility of the common law the Restatement comprises a number of clear succinct rules, fully explained by a supporting commentary, which set out the general law of
contract in England and Wales. Written by one of the leading authorities in this area, in collaboration with an advisory group of senior judges, academics, and legal practitioners, the Restatement offers a novel and powerfully persuasive statement of the law in this central area of English law. All lawyers dealing with the English law of contract, whether as practitioners, judges, academics, or law students, cannot but benefit from this Restatement. The English law of contract is one of the most respected systems of contract law in the world and by the device of a 'choice of law' clause is often chosen by foreign commercial parties as the applicable law to govern their contract. One of the aims of the Restatement is for the reader, including those from civil law jurisdictions, to see quickly and easily how the different elements of the English law of contract fit together.

Human dignity is one of the most challenging and exciting ideas for lawyers and political philosophers in the twenty-first century. Even though it is rapidly emerging as a core concept across legal systems, and is the first foundational value of the European Union and its overarching human rights commitment under the Lisbon Treaty, human dignity is still little understood and often mistrusted. Based on extensive comparative and cross-disciplinary research, this path-breaking monograph provides an innovative and critical investigation of human dignity's origins, development and above all its potential at the heart of European constitutionalism today. Grounding its analysis in the connections among human dignity, human rights, constitutional law and democracy, this book argues that human dignity's varied and increasing uses point to a deep transformation of European constitutionalism. At its heart are the construction and protection of constitutional time, and the multi-dimensional definition of humanity as human beings, citizens and workers. Anchored in a detailed comparative study of case law, including the two European supranational courts and domestic constitutional courts, especially those of Germany, the UK, France and Hungary, this monograph argues for a new understanding of European constitutionalism as a form of humanism.
